Anyconnect .pcf

May 20, 2016, 09:46

I had a problem with the Cisco VPN a few months back. It was "fixed" by using the AnyConnect client. What I learned while researching the problem was the following: "AnyConnect cannot confirm it is connected to your secure gateway. The local network may not be trustworthy. Please try another network." There may be several reasons. What is the default location of Cisco VPN client profiles? I need those .pcf files since my old Cisco VPN client doesn't work after upgrading to Mac OS X.
